

ART & OAKIE ASK

Who Lives in an OAK TREE?

ART BY JOSIANE VLITOS

Oak trees are home to lots of creatures, BIG and SMALL.

What can you see?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Bees build hives in hollowed-out trunks.

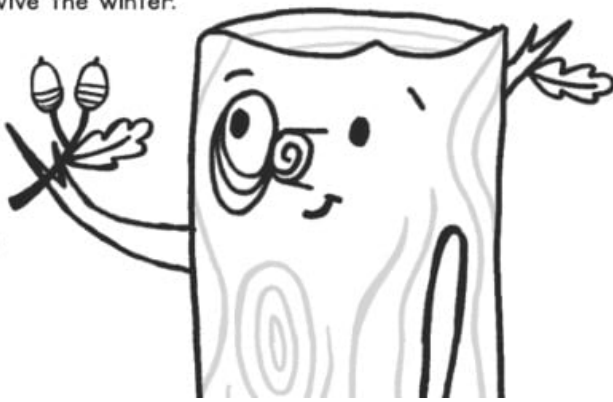

Small creatures like insects and ants live under the tree bark.

Acorn

Squirrels eat acorns. They store them in oak trees to survive the winter.

Oak Tree Leaf

ART'S NOTES

Oakie says a tree is like a town. So many animals live there. Some animals get their food from a tree. It's almost like a supermarket!

When lots of trees get cut down, it's called "deforestation." This has a **BIG** impact on all kinds of wildlife. That's why we have to protect the trees...to help our forest friends.
